

# Emory University ArcGIS Online Login Instructions

## Overview

ArcGIS Online is available to all Emory faculty, staff, and students for university-related teaching, research, learning, and administration. ArcGIS StoryMaps is a popular tool that uses this same account, but has a different URL.

## How to access ArcGIS Online

Visit <https://www.arcgis.com/> (this is the general URL), or go directly to Emory's site at <https://emory.maps.arcgis.com/> (the one to bookmark for future use!)

## How to access ArcGIS StoryMaps

Visit <https://storymaps.arcgis.com/> (Choose the first green button, "Sign in to ArcGIS StoryMaps")

There are 2 account types you can use to log into ArcGIS Online and/or StoryMaps:

The image shows a screenshot of the ArcGIS sign-in interface. At the top, it says "Sign in" next to the Esri logo. Below this, there are two main login options. The first option, labeled with a yellow arrow and the number "1", is "ArcGIS login". The second option, labeled with a yellow arrow and the number "2", is "Your ArcGIS organization's URL". Under the second option, there is a text input field containing "emory" and a dropdown menu showing ".maps.arcgis.com". Below the input field is a checkbox labeled "Remember this URL" which is checked. A blue "Continue" button is located to the right of the input field. Below the login options, there are four social media icons: GitHub, Facebook, Google, and Apple. At the bottom, there is a link that says "No account? [Create an account](#)" and a "Privacy" link.

**1. “ArcGIS login” (for accounts created prior to June 20, 2024)**

- a. If you already have an account under Emory’s ArcGIS Online organization (such as if you’ve created StoryMaps or other web applications for previous classes), you can use that to log into ArcGIS Online with this option. These accounts were created manually and do not use your Emory NetID/password to log in.

**2. Your ArcGIS organization’s URL (new accounts)**

- a. If you did not have an Emory ArcGIS Online account before June 20, 2024, then new accounts will be created by logging in via the familiar Emory NetID/password screen, which will then automatically create a new account for eligible users.
- b. To use this option, expand the lower login menu for “Your ArcGIS organization’s URL”, and type “**emory**” in the blank. (Our ArcGIS Online organization address is **emory.maps.arcgis.com**.)
- c. On the next screen, click the blue “Emory University” button near the bottom. This will redirect you to the NetID login screen and then activate your new ArcGIS Online account.
- d. You will continue to use this method to log in with your account once it’s created.
